

Our EcoBiome™ Technology Platform offers the ability to Innovate and Discover in science and industry.

EcoBiome is Sentinel Biologics' microbial screening platform that enables precise and rapid identification and characterization of novel micro-organisms in the environment. Integrating EcoBiome science into your program will ensure lasting superior innovation and results.

Our microorganisms are naturally-occurring, beneficial to the environment and optimized for nutrient utilization and performance.

EcoKinect™ *means proven pedigree*

Ecokinect is Sentinel's proven isolation and identification service that accurately characterizes novel microbial strains in the environment.

Sentinel's novel Ecokinect database rapidly "Kinects" the right microbial spores to a specific projects and region type based on its climate and ecological characteristics.

SporeKinect™ *for microbial customization*

By using our proprietary Sporekinect service, Sentinel can formulate the right product for your needs. Sentinel has the unique ability to rapidly "Kinect" microbial spores from our base products and "Kinect" novel spores that meet specific needs.

SOURCING

Our microbial strains are derived from clean sources.

SELECTION

Our microbial strains undergo high-throughput identification and characterization tests enabling selection based on their novelty and ability to perform unique functions in the environment.

SAFETY

Our microbial strains are isolated from known regions and sources and validated for their safety and effectiveness.

SUSTAINABILITY

Our microbial strains and products are naturally-occurring, eco-friendly, non-toxic, non-GMO and are beneficial to all soils and the environment.

Call us now at **1-281-300-8028** to find out how Sentinel's unique microbial services can help your business!
